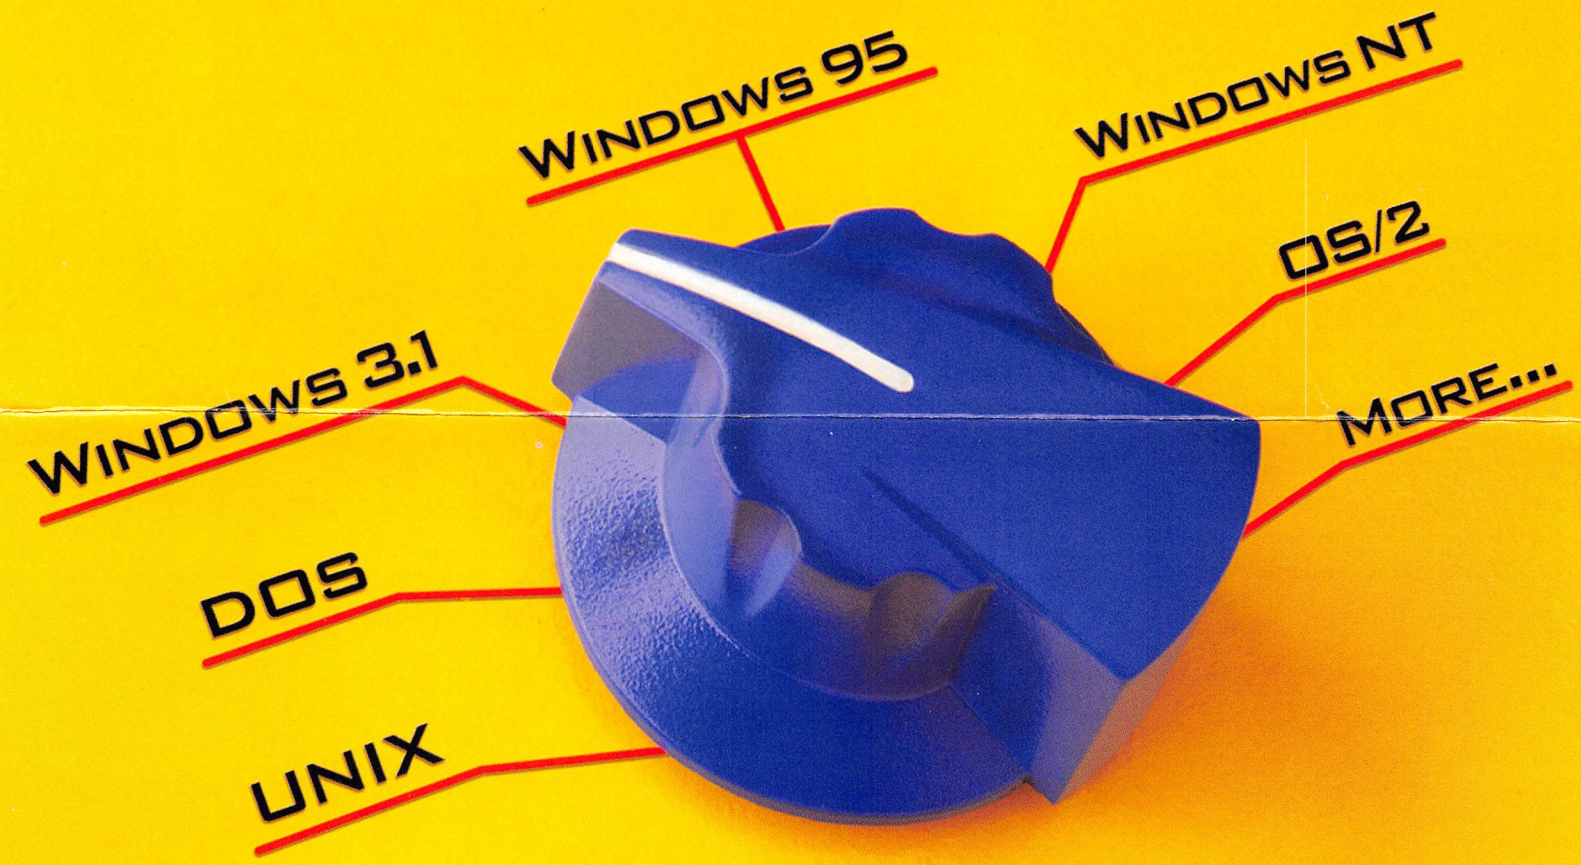
Now you can run more than one operating system on your PC!



SYSTEM

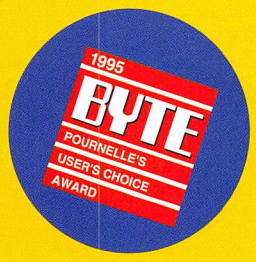
COMMANDER™

"System Commander is a blooming miracle"

Jerry Pournelle - BYTE

"Highly recommended"

John C. Dvorak - PC Magazine



Switch between OSes on your PC with a touch of a button!

Here's Why!

System Commander eliminates all the guesswork from adding and using new operating systems on your PC . Select Windows 3.1 or Windows 95 with the a click of a button. *System Commander* lets you run any combination of OSes on one PC. Best of all it uses no memory.

Run any DOS and any Windows 95 Game on the same PC

Is your favorite game written in an old version of DOS? Just reboot and *System Commander* lets you play it again, without giving up your current OS. Want to try the latest Windows 95 game? Reboot and you're in Windows 95-just like magic.

Compatibility Makes Life Easier

Does your office use OS/2 or UNIX, while you use Windows at home? With *System Commander* you can run them both on the same PC.

Solves Laptop Problems

Laptop users need different *combination.sys, autoexec.bat* or *.INI* files for portable use and for connecting to the network. Whether it's for OS/2, Win 95 or DOS, you simply select the configuration you need at boot time. System Commander does the rest.

Switch without Risk!

Unlike drivers and TSRs, *System Commander* uses no resident memory. This eliminates any possible clashes with your OSes or software programs.

System Commander provides tamper proof, system security. Your private password protects any or all of your operating systems from unauthorized access.

Quick & Easy Installation

System Commander's automatic installation will have your PC ready to add OSes in minutes. *System Commander* does not require a partition of its own and can even be installed from Win 95.

After installing *System Commander,* your first reboot brings up a menu of the OSes already installed. Select the OS you want and *System Commander* does the rest. Want to use another OS? Just reboot and make another selection.

Saves You Money!

Instead of investing $1000's in PCs, System Commander makes it easy for you to have up to 100 different OSes on one PC.

Boot from any combination of sizes and types of hard drives. System Commander can handle any Intel compatible OS, in English or any other language, and any combination of OSes!

Run any or all of these OSes on a single PC!

Coherent UNIX
